

Insurance Providers

Burke Rehabilitation Hospital's outpatient division participates in most insurance plans. However, you should be aware that insurance carriers offer multiple medical plans with differing coverage levels for various services. Depending on your plan options and specific diagnoses, outpatient rehabilitation services may or may not be paid for by your insurance carrier.

The most efficient way of determining which of Burke's outpatient programs and services you are eligible for is to contact the outpatient location you are looking to make an appointment at directly and speak with a representative regarding your coverage.
