FOR IMMEDIATE RELEASE

“BURKE REHABILITATION HOSPITAL ANNOUNCES FORMATION OF NEW PULMONARY DISEASE SUPPORT GROUP”

WHITE PLAINS, NY – August 19, 2011 – Burke Rehabilitation Hospital has announced that formation of a new Pulmonary Support Group for community residents that have a chronic lung disease such as Pulmonary Fibrosis or Chronic Obstructive Pulmonary Disease, commonly referred to as COPD. COPD is a lung disease that makes it hard to breathe. It is caused by damage to the lungs over many years, usually from smoking. Excess mucus is often the first sign of COPD. Chronic bronchitis and emphysema are common forms of COPD.

Patients with chronic lung conditions often share many of the same concerns such as “Why is it so hard to breathe?” and “Are there any exercises that can help me with my breathing?” Although there is no cure, various treatments can make the illness more manageable and the patient more comfortable. The goal of the new support group is to provide individuals living with chronic lung conditions with tangible tools to assist with the coping with the disease as well as a forum to speak about their experiences and share with others who have similar diagnoses. According to Pam Jones, PT. Program Director for the in-patient Pulmonary program “Individuals living with chronic lung conditions often times have questions and sources of anxiety that may be alleviated by a support group environment.

-MORE-
This will provide our community with an opportunity to stay educated regarding their disease management while networking with others who share their experiences.”

The new Pulmonary Support Group will meet at 2:30 pm to 3:30 pm the first Wednesday of every month in room B-204 in the Billings Building at the Burke Rehabilitation Hospital’s main campus at 785 Mamaroneck Avenue in White Plains, New York. The Pulmonary Support Group is free and open to anyone in the community. For more information about the group, please contact Pam Jones, PT at (914) 597-2843 or via email at p.jones@burke.org.

The Burke Rehabilitation Hospital is a private, not-for-profit, acute rehabilitation hospital. Founded in 1915, it is the only hospital in Westchester County dedicated solely to rehabilitation medicine. Burke offers both inpatient and outpatient programs for those who have experienced a disabling illness, traumatic injury or joint replacement surgery. Burke is both an acute rehabilitation hospital and medical research center. Burke’s world renowned doctors and therapists provide state-of-the-art treatment, while its research scientists explore the frontiers of neurological and pulmonary medicine. All share the Burke mission to ensure that every patient makes the fullest possible recovery from illness or injury regardless of their ability to pay.
