RESEARCH ABSTRACT

Dr. Lazar specializes in the relationship of cognitive function and brain disease and other illnesses, with emphasis on language, memory, reasoning and perception. Dr. Lazar's clinical research has been funded by the National Institute of Neurological Disorders and Stroke, the National Heart Lung and Blood Institute, the National Institute of Child Health and Human Development, the National Institute of Allergy and Infectious Diseases, the Langlofth Foundation, and other agencies. His publications have appeared in Neurology, Stroke, The New England Journal of Medicine, Nature, Archives of Neurology, Neurosurgery, Neuropsychologia, Circulation, Annals of Thoracic Surgery, and Archives of Clinical Neuropsychology. Co-authored with Dr. J. Festa, his book Neurovascular Neuropsychology (Springer) was published in 2009. He has testified before the US House of Representatives Select Committee on Aging. He currently serves on the Mechanical Circulatory Support Advisory Panel for the Center for Diseases and Radiological Health at the Federal Food and Drug Administration.
